**Ends**

### **About Cerecin**

Cerecin is a clinical-stage biotechnology company focused on developing drugs that target the metabolic bases of central nervous system diseases. Cerecin’s development program leverages its extensive experience in neurology drug development and lipid science. Cerecin is supported by two multinational partners, Nestlé S.A. (NSRGY), and Wilmar International Limited (F34.SI). By bringing together the deep expertise of its leadership team and a highly differentiated drug development program, Cerecin is becoming a global leader in neurology therapeutics.

### **About CER-001 (Tricaprilin)**

CER-0001, also known as *tricaprilin*, is a specific medium chain triglyceride that Cerecin is developing for a range of neurological indications including Alzheimer’s disease, migraine and infantile spasms. CER-0001 is a ketogenic compound that elevates plasma ketone levels and is thereby intended to leverage the numerous activities and benefits of ketone bodies.
